

OKAYO · TOUR-GUIDE SYSTEMS

OTG-200

OmniTour guiding system

Professional two-way wireless communication that allows the group leader and participants to speak and respond clearly.

The OmniTour is built for tours where people need to talk back — training, Q&A lectures, factory and site inductions. Guests press a button to ask a question, and the guide can run a roll-call or trigger a gathering alert to pull a group together. Three modes cover guiding, teaching and open discussion. Specialised interpretation set-ups may call for additional equipment, which we will confirm with your quote.

Key features

- ✓ Two-way communication allows participants to ask questions and respond
- ✓ Ideal for factory and mine environments, training, guided tours and group communication
- ✓ Three operating modes: Guiding, Teaching and Discussing
- ✓ Roll-call and group-gathering functions assist with group management
- ✓ Available with charging and carry-case options

BEST FOR

Site visits & inductions

USED FOR

Factory & Mine Tours

Guided Tours

Conferences & Interpretation

Talk - Talkback

Talk and talk back

The guide speaks to the whole group, and a guest presses a button to ask a question or respond, with nothing to learn first. Roll call and Gathering help the guide keep the group together.

Specifications

Frequency & channels	Supplied in the South African configuration — confirmed with your quote
Modulation	GFSK
Operating range	70–100 m (line of sight)
