

OKAYO · TOUR-GUIDE SYSTEMS

WT-500

International travel tour system

A reliable one-way wireless tour-guide system that keeps every member of the group connected to the guide, clearly and comfortably.

The travel workhorse. A single AA battery runs a WT-500 receiver for up to 15 hours, which keeps battery changes — and the number of spares you carry on tour — to a minimum. A channel lock stops guests nudging themselves off-channel, and the backlit LCD stays readable in a dim gallery or an early-morning game drive.

Key features

- ✓ One transmitter communicates to multiple receivers simultaneously
- ✓ Lightweight and easy for guides and guests to use
- ✓ Ideal for guided tours, factory and mine visits, conferences and group communication
- ✓ Available to buy or rent from WSS

BEST FOR

Conferences

Multi-language groups

Large tours

USED FOR

Conferences & Interpretation

Factory & Mine Tours

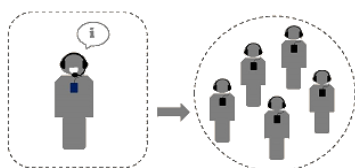

Guided Tours

Safari & Nature

Education & Events

Worship & Assistive Listening

1 Guide - 1 Group

One guide, one group

The guide speaks into the WT-500T transmitter. Each guest listens on a WT-500R receiver with an earphone or headphone, up to 100 m away in line of sight. Several groups can work side by side, each on its own channel.

Specifications

MANUFACTURER

Frequency & channels	Supplied in the South African configuration — confirmed with your quote
Operating range	100 m (line of sight)
Battery life	Receiver 12–15 hr · transmitter 9–10 hr
Power	1 × AA (1.2 V Ni-MH or 1.5 V alkaline)
